

```

interface BasicInterface implementation-class test.BasicInterface
{
    operations:
        operation1;
}

component LeafComponent implementation-class test.LeafClass
{
    attributes:
        attribute: primitive_type;
    ports:
        port1 [0..*] provides Interface;
        port2 requires Interface;
    port-links:
        port_link joins port1 to port2;
}
  
```
